保存与运输

复溶 Reconstitution	Reconstitute at 0.25 μg/μl in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.
储存 Storage	Store it under sterile conditions at -20℃ to -80℃. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.
运输 Shipping	In general, recombinant proteins are provided as lyophilized powder which are shipped at ambient temperature. Bulk packages of recombinant proteins are provided as frozen liquid. They are shipped out with blue ice unless customers require otherwise.

功能描述

研究背景 Background

Recombinant DENN domain-containing protein 2D (DENND2D) fragment (amino acids 52-471) from Homo sapiens, encompassing the complete uDENN, cDENN, and dDENN functional domains. This high-purity fragment serves as an essential tool for investigating the guanine nucleotide exchange factor (GEF) activity and Rab protein regulation mechanisms in cellular processes.
The full-length DENN domain-containing protein 2D, encoded by the DENND2D gene, functions as a guanine nucleotide exchange factor (GEF) that activates RAB9A and RAB9B by promoting GDP-to-GTP exchange, thereby converting inactive GDP-bound Rab proteins into their active GTP-bound forms. This activity is crucial for intracellular trafficking and membrane dynamics. The protein is localized primarily in the cytoplasm, as supported by experimental evidence. The provided fragment (52-471) strategically includes all key functional domains (uDENN, cDENN, dDENN), enabling focused studies on domain-specific roles in Rab protein activation and related cell
